

## WHAT IS CSI?

Founded in 1948, the Construction Specifications Institute is a not for profit technical organization dedicated to the advancement of construction technology through education, communication, research, and service. CSI serves the interests of the entire construction team: architects, engineers, interior designers, contractors, product manufacturers, suppliers, contract administrators, and owners. Affiliates are being formed throughout the country.

CSI's greatest assets are its 140 chapters located within 10 geographic regions around the globe. With nearly 18,000 members CSI has a diverse membership whose experience and knowledge in all aspects of the construction industry is available to institutions of higher learning. In addition, CSI can provide products and services to complement present curricula to the mutual benefit of faculty, students and CSI. There is an ever-growing enrollment of students who actively participate in their parent chapters' programs.

## WHAT BENEFITS DO STUDENT MEMBERS GET FROM CSI?

- Monthly educational programs
- Networking with future employers, clients, and community leaders
- Certification programs in 4 different areas of expertise
- Scholarship opportunities
- Institute convention programs and activities designed especially for students
- National and local exhibits showcasing a variety of construction related products and materials
- Region conference activities where students meet and share experiences
- Receive The Construction Specifier, CSI's award winning magazine
- Access web-based interactive seminars and online resources
- Find jobs with the CSI Career Center. Register and upload your resume or search the jobs posted.
- Launch your career by taking CSI Construction Document Technology (CDT) exam and earn the certification that demonstrates to the industry your knowledge of construction documents
- Lots of food, fun, and fellowship

If you are graduating and looking for your first job, use your CSI membership as a stepping stone to a rewarding career. By attending local chapter meetings and networking with construction and design professionals, you'll stay informed about the employment outlook in your area.

14 student teams from 10 universities in a competition at CSI University in San Antonio

**CSI Students** are people who desire to be involved with a professional organization that both mentors and helps with finding jobs in the professional world. CSI offers many scholarships to its students, as well as travel opportunities and design competitions. CSI is full of professionals that are willing to help students in any way they can because the students of today are the professionals of tomorrow.
